THIS is the point, esteemed friends "which has been decided by Judge Woodbury of the U. S. Supreme Court as to tide waters;" and when you are prepared to prove that the Light Houses, the Break-waters, the Ports of Entry, the Cus-Congress, (and pocketed by Mr. Polk.) of structions from its navigable waters, donot indicate slightly that the waters of Lake Champlain have been" legislated on" by Congress for the past quarter of a Century, the parallel will

be a leetle more obvious.

However, gentlemen, we have no special desire to prolong this controversy. If you will let us quietly alone, when we don't say anything, we will be much obliged to you.

Among the papers that were squeezed from first step in an act which has cost the nation more blood, treasure and reputation than can at present be estimated. Santa Anna has proved, as be showed himself at the Alamo and at Goliad, in Texas, the bloodiest, the most inveterate and Implacable, the ablest, the most faithless and vindictive foe that Americans ever contended against! And yet this atrocious butcher and assassin, this cock-fighting, gambling desperado, speech of shreds and patches of prose and poetry, whom love of country has never restrained from of Senator Foote of Mississippi, the Union says inciting Civil War, and whose personal honor is but another name for treachery, was granted a Free Pass through the American blockading squadron, by James K. Polk! And this same James K. Polk dares to prate about the Whigs giving aid and comfort to the enemy!" Here is what the Mexicans found to be " aid and comfort," at any rate :-

Great Publication in Press.

We have heard it whispered in literary circles that Dr. Cobb, the Poet Laureate, has in embryo a work on the License Law, which he will give to the world before long, and which will settle the troublesome and perplexing questions, moral, civil, and military, growing out of that Law, in a most summary and satisfactory manner.—

The doctor's intellect, always of an extraordinary character, brightens as Time and Experience shed their lore upon him, and we are justified in promising the public one of the most remarkable literary productions of the age. We understand the Doctor is hostile to the existing Law, and is prepared to submit a substitute which will possess the rare quality of entirely mitting public opinion as to its merits. To bring about such a result obviously requires great sagacity and skill. The Doctor is now employed in obtaining subscribers to his forthcoming work, at the low price of 81 per 100. When wisdom is resonance the subscribers to his forthcoming work, at the low price of 81 per 100. When wisdom is resonance the subscribers to his forthcoming work, at the low price of 81 per 100. We ought, perhaps, in this connection, to say that the Doctor does not by any means intend to abandon his great work on the Rise, Progress and prosperous condition of Vermont, with picturesque views and comic songs. This be designs as his chief legacy to posterity. The hurry and press of public business incident to the closing days of the Legislature, alone prevented that Body from availing itself of the Doctor's proposition, as set forth in the following note addressed to the President of the Senate, and handed to us for careful preservation. His Honor, the Lieut. Governor, evinced much feeling in the perusal of this note, as we are able to testify. Whether the sensibility of others will be similarly affected remains to be seen. We be similarly affected remains to be seen. We deem it prudent to suppress the pointed allusion in the concluding paragraph:—

Sir—By the request of many of my friends I have proposed delivering a discourse before the Legislature of Vermont, upon the Rise and Progress, and prosperous condition of Vermont.

Although we gathered, and communicated to our readers, a few items of information touching "Nathaniel Niles of Vermont," our friend of the Bellows Fails Gazette has more, and thus satisfactorily replies to our enquiry if it could gratify our curiosity in the premises:—

The father was a member of Congress from this State for four years, from 1791 to 1795 and was agood deal moted for his eccentricities. The son was enhanted a Physician, married in this country, and if we are not mistaken, did not live very happily with his wife. At any rate, some twenty, or twenty-five years since, he left the country, it was said to get rid of his better half, went to Paris, in which city he has resided most of the time since. XXXth CONGRESS.

Monnay, January 17.

In the Senate, Mr. Mangum's resolution calling for Gen. Scott's plan of the war was taken up. Gen. Class opposed its passage. He thought a disclosure of the plans of the war at this time, would be highly injudicious. Mr. Mangum defended his resolution, indignantly repelling the idea that the plans of the executive might not be disclosed to the American people, when it was known to be the fact that they had already been disclosed to the Mexican people by public orders from the general in chief of the army.

Mr. Allen of Ohio opposed the resolution and moved that it be laid on the table, but the subject was passed over informally.

Mr. Mangain Son these resolutions :—
